Sample Report			

Test Name	CPT Code	Result	Units	Reference Range
Thyroid Stimulating Hormone (TSH)	84443	2.10	μIU/mL	0.5 - 5.0

Your TSH test result is within the normal reference range.

If your TSH is outside the normal reference range you do not necessarily have thyroid disease. Also, a TSH result within the normal range does not necessarily rule it out. Your BIOSAFE TSH result is not a diagnosis of thyroid disease. Only your doctor can make an accurate diagnosis with additional testing.

Conditions other than thyroid disease can affect your TSH level. We recommend that you contact your doctor soon for a follow-up and a complete explanation of your test result. If you have questions about your test result, call a BIOSAFE nurse toll-free at 1-888-700-8378 Mon to Fri, 8 a.m. to 5 p.m. Central Time.

Testing should not replace regular visits to your doctor. **Never adjust your medication before you consult with your doctor.**
